

A Block

Only the ground floor and first floor were completed for the school's opening in 1974. Construction on the top floor continued while students worked in the classrooms below. In addition to classrooms, A Block also housed Administration and the Library (A12-A13) which wasn't completed until 1979. There is still a switch on the wall in one of the first floor rooms which rang the bell.

A Block included a small tuckshop, boys toilets and a janitors cage with the rest of the space an open area with benches.

This space now includes an expanded Canteen with Coffee Shop, offices and the Uniform Shop which moved into A06 in 2019.

There are updated student and staff toilets and cleaners storage. Added in 2017, the deck outside the canteen provides additional space and tables for student use.

The first school computer rooms (A11 and A12) were shared by all students. With the introduction of the TIC program in the early 2000's A21 and A22 became TIC homerooms where all TIC subjects were taught. These were the first classes to have one-to-one devices for learning. Guidance Officers were in A20 until the extension of the lower level of the Administration building when they moved into Student Services. A refurbishment in 2019 updated the top level of A Block, modernising the hospitality and food technology classrooms.

In 2018 a purpose built Uniform Shop was constructed using the Chaplain's Office, Groundsman's workshop and A06, moving the Uniform Shop from underneath the Administration building back to A Block.
